Wifi-enabled for
better comfort
and savings

Easily adaptable to any space

The TACTIC Wifi heater makes for a cosy atmosphere, whether it's your living room or bedroom.

Experience true comfort with the Capa Connect App

By reducing the temperature or use of the heating during periods when you are asleep or away, you can save energy without compromising your comfort.

It's never been simpler to manage your comfort – you can organize your products into zones for ease of control and create weekly schedules that'll suit your lifestyle, either through the app itself or through voice control via Google Assistant and Alexa.

Manage your comfort

The collage consists of six smartphone screens illustrating the app's features:

- Screen 1:** Titled "Easily control your products in one simple view", showing a "Kitchen" zone with a temperature of 19°C and a "24 hour Comfort" schedule.
- Screen 2:** Titled "Set up multiple sites and group your products into zones", showing a "Home" site with zones for Kitchen, Bedroom, and Living Room, each with a "Panel heater" product.
- Screen 3:** Titled "Create schedules with modes that are adaptable to your lifestyle", showing a "Living Room" zone with a "Looking for cooks..." mode.
- Screen 4:** Titled "Manage your product with voice control using Google Home and Google Assistant", showing a microphone icon and buttons for "Link with Amazon Alexa" and "Link with Google Home".
- Screen 5:** A screen showing a "24 hour Comfort" schedule with a "Change" button.
- Screen 6:** A screen showing a "Products" list with a "Thermostat" and two "Panel heater" units.

At the bottom right, a smartphone displays the CapaConnect logo and the tagline: "The effortless heating app that puts your comfort first."

Natural convection

Patented manufacturing process for a one-piece, mono-metal aluminum alloy emitter with a surface treatment that optimizes heat exchange.

Technical features

- Specially designed finned air outlet for effective and even distribution of heat.
 - Aluminium heating element, with its optimized X shape, specially designed to create gentle heating by natural convection:
 - - robust and reliable
 - - silent operation
 - - speedy heat up
 - Wifi-enabled control with digital display:
 - Room temperature control
 - Easy temperature adjustment with + and - buttons.
 - Manual selection between Comfort / Eco / Away / Standby mode
 - Power cord fitted with European-style plug
 - Available with optional castors for portable use
- In WiFi mode:
 - Remotely switch between heating modes
 - Room temperature control
 - Programming schedules
 - Key lock
 - Home / room / heater management

Class II
IP X4 - IK08
Single phase 230 V
