

Cyanoacrylate Activator (I269)

How can you accelerate drying time of glue? It is so simple, thanks to this product included in the Ambro-Sol “Adhesive” line. You can apply it before and after the glue action, and it guarantees a long term fix.

Quantity	200 ml
Barcode	EAN 13: 8034108892702
Box / Case	12 pz

CYANOACRYLATE ACTIVATOR – The cyanoacrylate adhesives activator is a product designed to promote the speed of drying with adhesives. It can be applied before or after bonding. Product free of amines, especially suitable when quick drying time is required. It is often used, before or after gluing, to ensure a rapid process of chemical crosslinking and fixing. This product is not suitable for chlorine-based adhesives or highly oxidizing product.

Technical Specifications:

Aspect	Tin-Plate can containing under pressure fluid
Color	Transparent
Odour	Characteristic of solvent
Relative density	at 20°C 0,68 ÷ 0,72 g/ml
Flash point	Und. 0° C extremely flammable
Pressure at 20°C	4/6 bar
Vapor pressure	250 hPa (20°C)
Stringiness at 25°C	0,700 mm ² /s SIO D445 (ASTM D445)
Active ingredient <1%	CH ₃ C ₆ H ₄ N(CH ₃) ₂ (pure at 99%)
Refractive index	n ₂₀ /D 1.525 lt. (dry residue)

HOW TO USE: Shake well before use. The surfaces must be dry and cleaned. Avoid contact between adhesive and activator. Apply one or two coats of activator on both the surfaces to be glued. Allow 1-2 minutes for the product to penetrate the surface. Now apply adhesive cyanoacrylate following the profile, our Codes I265 or I266. The activator may be aggressive on some surfaces, it is recommended test on a hidden part of the object.

MODALITY OF STORAGE

Before using: stock the product in a dry location and don't stock it with a temperature under 0°C and over 45°C, after the use, keep containers closed. In the original package, the product can be conserved for 24 months (warranty). The product doesn't expire.

After the first usage: conserve in a fresh and dry location, away from hot spring. Keep out of reach of children.
