

PAWBOL Baltic

WE HAVE
SOLUTION
SERVICE
CAPABILITY

Who we are?

In 2015 **PAWBOL Baltic** was established in Riga, Latvia as the official representative of Pawbol company - the electrotechnical equipment manufacturer.

Our solutions are based not only on our own brand, but on the leaders of the segment:

These are reliable partners with professional solutions!

Pawbol Sp. z o. o. is a recognized manufacturer of electrical equipment in Poland and Europe, which started its activity in 1989 from the production of thermosetting holders. The company's headquarters is in Andrychów in the Malopolska province and due to the dynamic development of the company, Pawbol built its second facility in Zator. Since the beginning of its activity, the company has established itself as a solid and reliable business partner, becoming a synonym of reliability and trust for many.

From idea to final product - 30 years in electrical installation branch

ABL – since 1923

We are a family business with an international outlook and based in Lauf in the Nuremberg metropolitan region.

In 1925, WE invented the SCHUKO plug. Whether the classic rubber plug or the innovative Elamid plug – ABL is the original.

ABL

We are good at:

Low voltage devices

Combination units

Caravanning

e-Mobility

BTicino was founded shortly after the Second World War, in a climate of fervent industrial expansion, BTicino was the first Italian manufacturer to tackle the problem of producing electrical components in light of modern design thinking. It has been a part of the Legrand Group since 1989. Its acquisition of BTicino has given Legrand a brand name that represents, at the international level, the best traditions in Italian design and production. At the moment Bticino is one of the world's leading innovators in design and functionality for such products as:

Switches and sockets

Door entry systems

Connected and atomized solutions

Zucchini busbars

bticino

As good example of such innovations is latest Bticino projects "Torre Milano", it is unique project where all wiring devices are connected and integrated with virtual assistant from Amazon – Alexa. How does it work? See it yourself in this video:
